Career Objective

Motivated and detail-oriented Data Science fresher with strong analytical, statistical, and programming skills. Seeking an opportunity to apply data-driven approaches to solve real-world business problems and contribute to impactful AI and machine learning projects.

Education

B.Tech in Computer Engineering	XYZ University, Pune	2024	CGPA: 8.6/10
Higher Secondary (12th)	ABC Junior College	2020	Percentage: 85%

Technical Skills

Programming: Python, R, SQL **Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn **Tools:** Power BI, Tableau, Excel, Jupyter Notebook **Machine Learning:** Regression, Classification, Clustering, EDA **Database:** MySQL, PostgreSQL **Cloud (Basic):** AWS, Google Cloud Platform

Projects

1. Car Price Prediction using Machine Learning

Developed a regression model using Python and Scikit-learn to predict car prices based on features like mileage, fuel type, and year of manufacture. Achieved 92% accuracy after model tuning.

2. Netflix User Behavior Analysis

Performed data cleaning, visualization, and clustering to analyze user viewing patterns using Python (Pandas, Seaborn). Generated insights to improve recommendation strategies.

3. Student Performance Prediction

Built a classification model to predict student outcomes based on demographic and academic factors using logistic regression and decision trees.

Certifications

- Google Data Analytics Professional Certificate (Coursera)
- Machine Learning with Python (IBM Skills Network)
- SQL for Data Analysis (Kaggle)

Strengths

- Strong analytical and problem-solving skills
- Eagerness to learn new technologies

- Effective communication and teamwork
- Adaptability and attention to detail

Declaration

I hereby declare that the above information is true to the best of my knowledge and belief.
